EsquinaDeLosCafes is an active technical research project on coffee processes.
Our objective has always been the contribution of added value and the quality regulation of specialty coffees under the criterion of being a Coffee Center, an information center about coffee in each of its stages.

EsquinaDeLosCafes as a coffee shop is the only store specializing in non-conventional coffees: semi-washed and non-washed, which makes us world pioneers in specialty coffee by cup profile.
EsquinaDeLosCafes has invested a lot of time and money to create a center for research and profiling for export. Several negotiations are already documented with our partners in Germany, and we have already converted exporters into buyers of regional coffee from Matagalpa via direct commission and with it the direct negotiation of the coffee producing parties vs. Nicaraguan coffee exporter.

EsquinaDeLosCafes goes through a situation of liquidity insolvency due to protests and street blockades, and communication problems between citizens vs. the Government of Nicaragua. We thank the people who have advocated a peaceful resolution in this Civil War in Nicaragua.

EsquinaDeLosCafes apologizes to any person affected economically by the current situation and we are pending to summarize communication and business as soon as possible.

EsquinaDeLosCafes requests FINANCIAL assistance from friends, clients, and other people who want to help keep this regional coffee project alive in Matagalpa, Nicaragua.
